GREAT DIVIDER

Great Dividers are a brand new rolling wall system for flexibly dividing space and providing effective visual and acoustic barriers. While providing excellent space division, when not being used they simply fold up and roll away in seconds into a compact and storable unit.

Great Dividers are a completely modular system allowing you to add panels to create the length of divide you need, up to 7.5 metres long. For even longer configurations units can be ganged together. A 4-piece ganging kit link sets together. One set of four is required for each pair of end panels to be joined together

Great Dividers come in two heights: 1820mm high (6 foot) or 2438mm high (8 foot). While the most popular version is the blue fabric wall, there is also the option of a pair of dry-erase whiteboard wall panels.

Great Divider fabric panels are pinna- ble with a soft substrate, which also aids sound attenuation.

The end panels of the Great Divider includes locking casters for added stability. The casters are attached to 18-gauge steel legs with an innovative spring suspen- sion system that keeps the panels level on any surface.

STARTER SET

The base unit is the Starter Set which comes ready to use and consists of 3 wall panels (2 x 850mm & 1 x 820mm wide) and two perpendicular end panels (700mm wide). Starter Sets are complete and ready to use, or ready to be added to with add-on panels.

ADD-ON

Add-on panels come in hinged pairs, with each panel measuring 820mm wide. Like the Starter Sets there are two heights: 1820mm high (6 foot) or 2438mm high (8 foot). The optional dry-erase whiteboard features a high pressure laminate dry-erase surface that pro- vides smooth writability, easy erasability and excep- tional durability.
